Screenshots

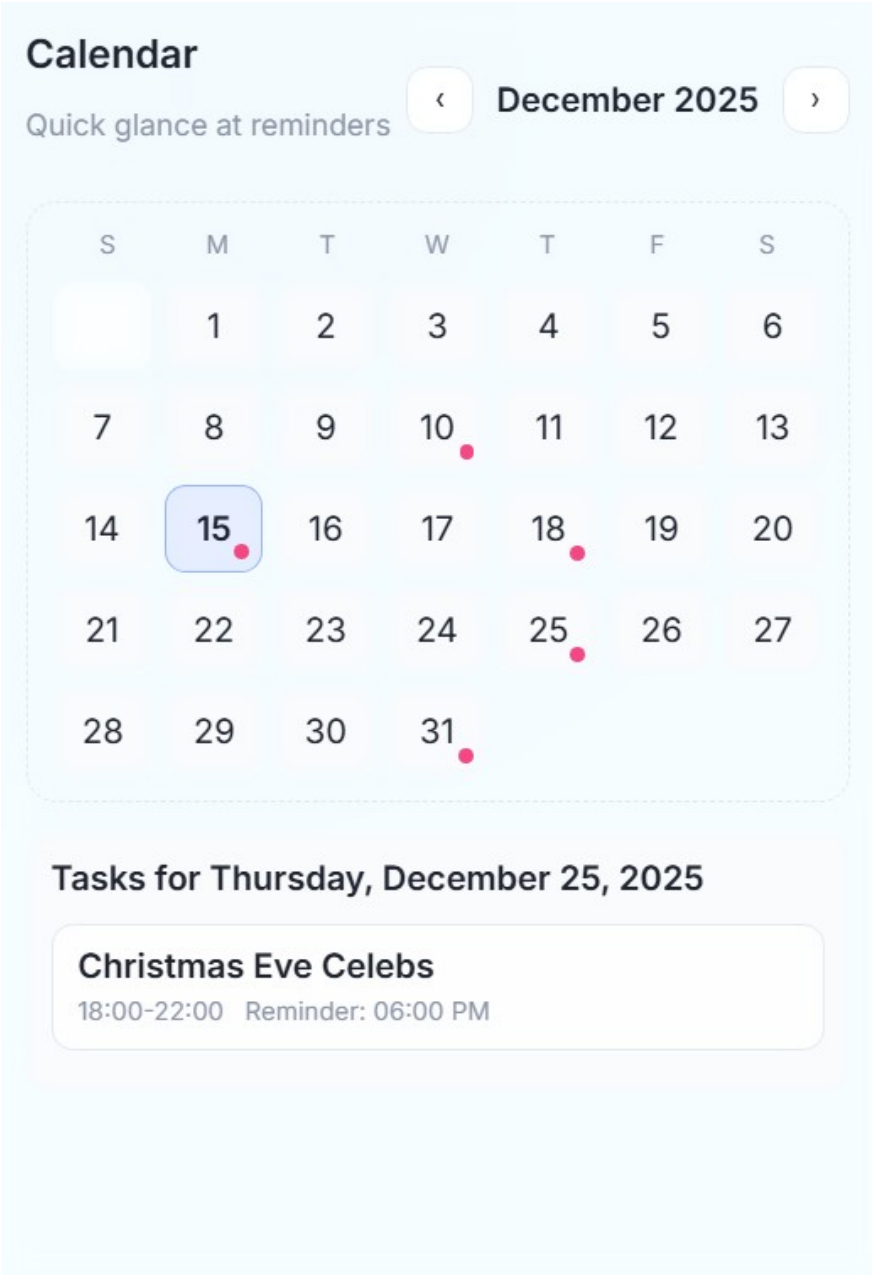

The below is the main home page of the project in which a new task can be added, a calendar view of all the tasks will be visible, and added tasks can be deleted and edited. Furthermore, the tasks can be sorted in three ways: by date, by A-Z, and by Z-A.

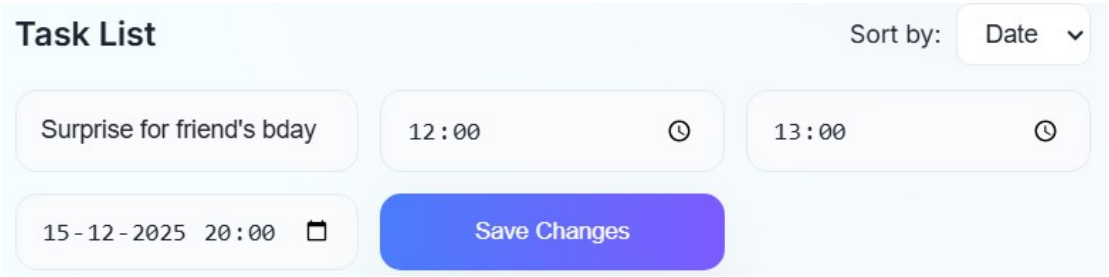

The below screenshot shows the adding of the task function. We can also set a reminder for a task, which will be visible below the calendar when the time is within 30 minutes of the reminder time set.

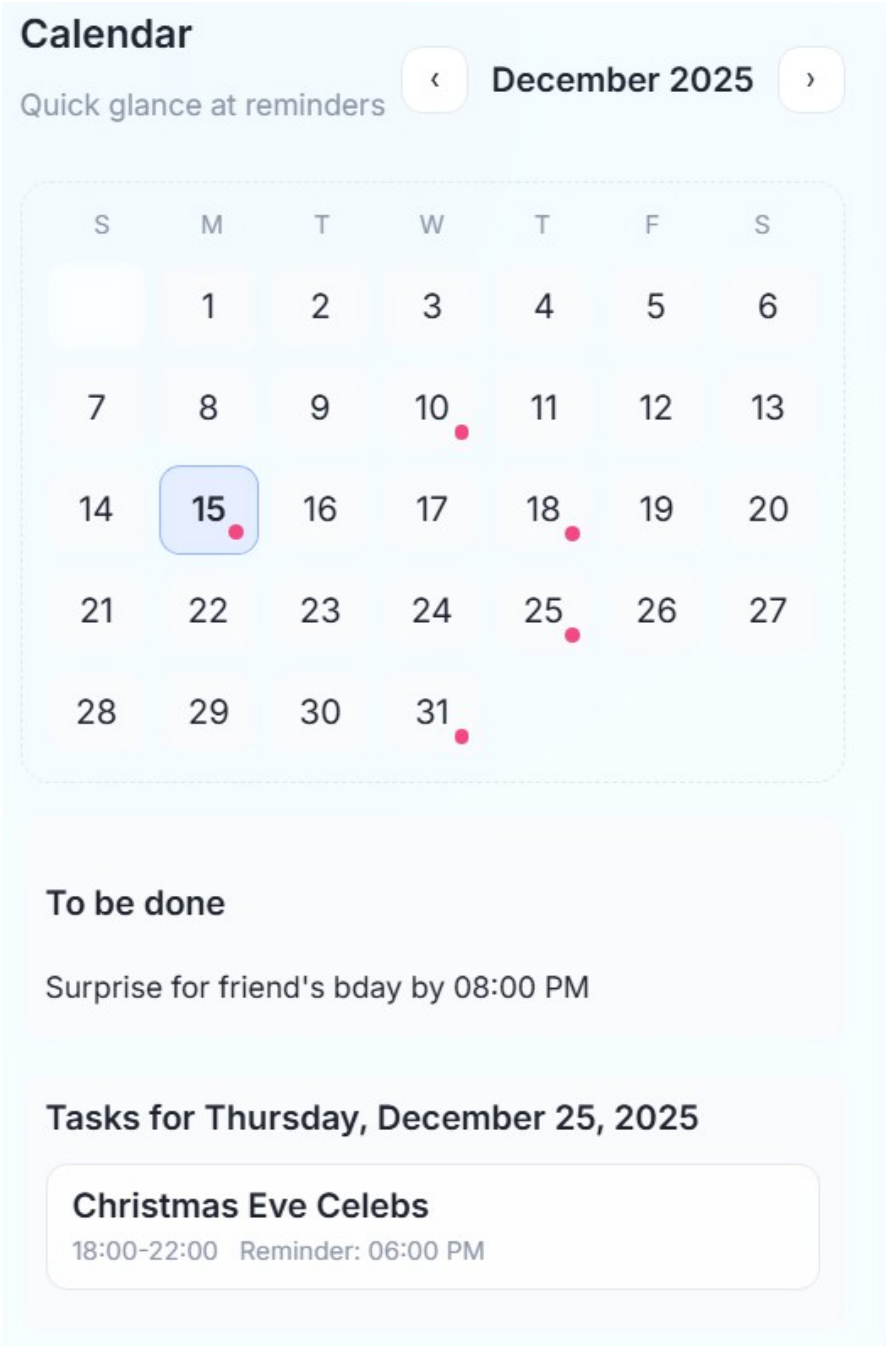

The newly added task is visible in the calendar once added.

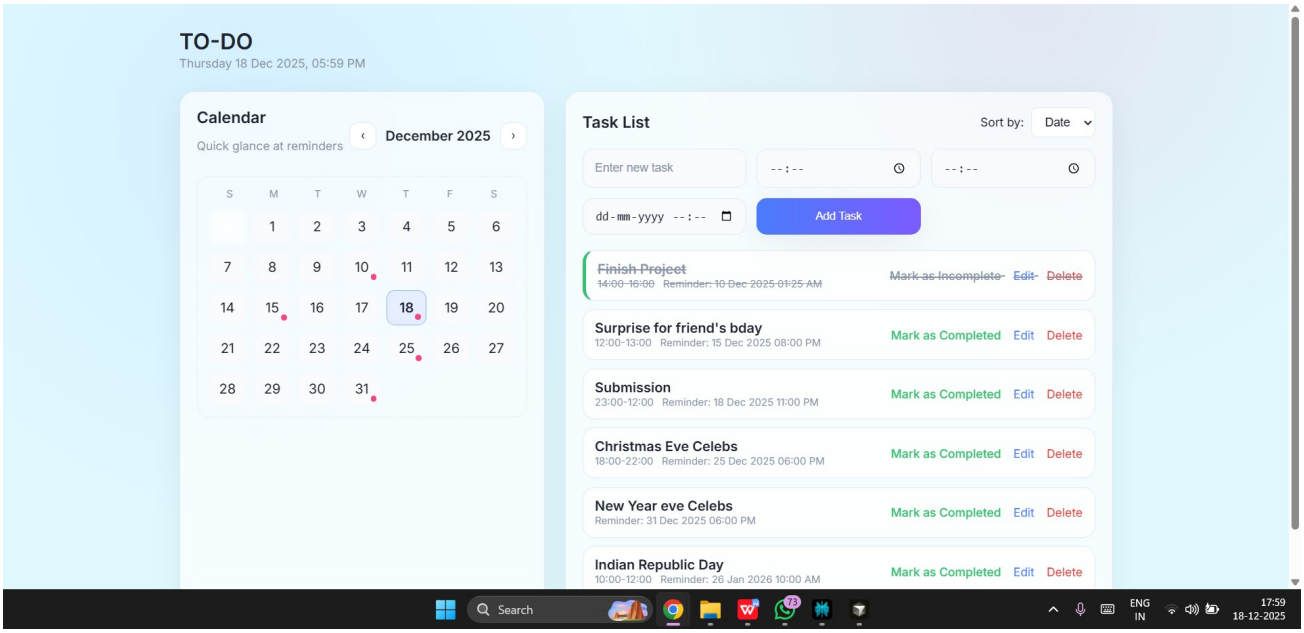

The below screenshot shows the edit task operation in which all the aspects of the task can be edited.

The screenshot below shows the change in the remainder of a task scheduled for 8 PM on 15th December 2025, which is displayed because it is within 30 minutes of the current time.

Here, we have marked the task as completed.

Here, we have deleted the task from the list.
